Hello! I'm David, a graduate in Computer Engineering and Business Administration, currently specializing in **Machine Learning** and **Computer Vision**. I have practical experience in the data lifecycle thanks to internships as a **Junior Data Engineer**. I'm interested in **narrow AI** and **trustworthy AI**, which are focused on solving specific problems with lower resource consumption and greater traceability in the results.

Academic Background

University of Granada — *Granada*, *2019 - 2026*
Joint Honours Degree in Computer Engineering and Business Management

Average score of 8.01 in Computer Engineering and 8.36 in Business Managament.

Universitat Politècnica de València — *València*, *2026 - Present*
Master's Degree in Artificial Intelligencia, Shape Recognition and Digital Image

Projects

Final Degree Project — *Granada*, *2025*
Quantification of the uncertainty in machine learning model predictions for biological profile estimation problems

In collaboration with Panacea Cooperative Research. Supervised by Pablo Mesejo Santiago and Javier Venema Rodríguez. Code available on GitHub.

- Development of deep learning models using **PyTorch** to estimate a person's age and sex based on maxillofacial X-rays, with uncertainty quantified using **prediction intervals and sets** with a specified confidence level.
- Access to and management of **confidential information** (medical images used in training).

Work Experience

Cívica Software — *Granada*, *July - October 2024*
Junior Data Engineer (Extracurricular internship)

- Relational database management and data warehousing in Teradata and Snowflake, ensuring data integrity.
- Monitoring data pipelines via **ETL** processes with **Informatica Powercenter**, guaranteeing accurate loading into the Data Warehouse.
- Writing and maintaining technical project documentation using Microsoft Word, ensuring process clarity and facilitating the onboarding of future team members who share my initial questions.
- Developing charts and statistical reports for **KPI** tracking with **Power BI**.

IT Skills & Tools

Computer Vision and Deep Learning	Advanced	OpenCV, PyTorch, TensorFlow, Hugging Face, ONNX
Data Science and Analytics	Advanced	Pandas, Polars, NumPy, Scikit-Learn, Matplotlib, Plotly, Power BI
Data Engineering	Intermediate	Snowflake, Teradata, Informatica PowerCenter
Programming Languages & HDLs	Python (Advanced), SQL and C++ (Upper-Intermediate), Java (Intermediate), Verilog Intel/Altera (Basic)	
Other Tools & Environments	Daily use of Git, Linux & Windows ecosystems, Microsoft 365 suite	

Languages

Spanish	Native
English	Upper intermediate (Cert. B2 Cambridge)

Further Information

- **Served as secretary in** DEIIT (the Student Council of Computer Science and Telecommunications) for three years in the University of Granada. My duties included: convening plenary sessions, drafting and publishing minutes, updating the census and helping to organise events in conjunction witht he school management.
- **Referenced by** Pablo Mesejo Santiago (see his recomendation letter on my website), professor at University off Granada and cofounder of Panacea Cooperative Research.
